SKILLS SUMMARY

Skill	Level
HTML	80%
CSS	75%
JAVASCRIPT	75%
REACT-NATIVE	70%
REACT	70%
JAVA WITH SPRING	60%
MySql	60%
github	75%

EXPERIENCE

Chalau Rental (Mobile App)

I had the incredible opportunity to work as a React Native Developer on the Chalau project, a dynamic and challenging platform. Collaborating with a talented team, I contributed to developing a feature-rich mobile application that emphasized real-time map integrations, efficient UI/UX design, and robust backend connectivity. (now Chalau is available on playstore)

E-Learning System(Learn-Up)

I had the privilege of working on the Learn-Up project as a React.js Frontend Developer and Backend Developer using Spring Boot. This e-learning platform was designed to provide a seamless user experience for learners and administrators, featuring course management, user registration, and dynamic content delivery.

Jamana Studio Team Project

As a Web Developer at Jamana Studio, I played a pivotal role in a dynamic team tasked with designing and developing the company's website to showcase its portfolio and services.

E-Learning System(Learn-Up)

Led a comprehensive project to develop and implement a Gym Management System aimed at enhancing operational efficiency, member satisfaction, and revenue generation
